Abstract: The National Emission Standards for Hazardous Air Pollutants (NESHAP) for Magnetic Tape Manufacturing Operations (40 CFR part 63, subpart EE) were proposed on March 11, 1994; promulgated on December 15, 1994; and amended on April 9, 1999. These regulations apply to existing and new magnetic tape manufacturing operations facilities, including solvent storage tanks, mix preparation equipment, coating operations, waste handling devices, and condenser vents associated with solvent recovery. New facilities include those that commenced either construction, modification, or reconstruction after the date of proposal. This information is being collected to assure compliance with 40 CFR part 63, subpart EE.

Form Numbers: None.

Respondents/affected entities: Existing and new magnetic tape manufacturing operations facilities, including solvent storage tanks, mix preparation equipment, coating operations, waste handling devices, and condenser vents associated with solvent recovery.

Respondent's obligation to respond: Mandatory (40 CFR part 63, subpart EE).

Estimated number of respondents: 3 (total).

Frequency of response: Initially, quarterly, and semiannually.

Total estimated burden: 2,240 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$302,000 (per year), which includes \$33,000 in annualized capital/startup and/or operation & maintenance costs.

Changes in the Estimates: There is decrease in the total estimated respondent burden compared with the ICR currently approved by OMB. The adjustment decrease in burden from the most recently approved ICR is due to a decrease in the number of sources. Based on a review of ECHO sources and consultations with the Agency's internal industry experts, three sources are identified to be subject to this rule. The previous ICR indicated four sources. The overall result is a decrease in burden and operation and maintenance costs. This ICR continues to assume that at least one existing source will construct a new line with enclosure each year, therefore, there is no change the capital costs estimated in the currently approved ICR.

Director, Regulatory Support Division.
